

Krispy Kreme implements V5 Traceability

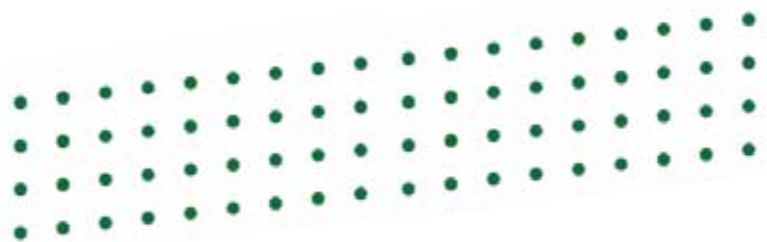

Congratulations to Alex Salnikov and the team at Krispy Kreme on the rapid implementation of the V5 Formula Control Scale System at their Queensland, Australia Facility.

Krispy Kreme's V5 implementation enables scaling operators faster, more reliable batches – improving productivity and reducing batch errors. In just over 1 business day, the Krispy Kreme team (with support from our Australian Distributor Wedderburn Scales) installed the system, trained their operators and scaled off dozens of perfect batches!

| Krispy Kreme implements V5 Traceability

- Improve Batch Consistency
- Increase Production Yield
- Reduce manual Traceability
- Save Overtime Costs
- Gain Customer Confidence

Queensland is the second Australian Krispy Kreme site to implement the V5 Formula Control Scale Solution (following the successful pilot at Huntingwood). The V5 System is designed to significantly improve ‘on target’ batch percentage, reduce ingredient waste and introduce a very high level of product consistency and electronic traceability.

Engineering Manager Alex Salnikov comments -

Engineering Manager Alex Salnikov comments “V5 has enabled our business to achieve greater productivity and quality. We are aiming to install these systems across all our Australian and New Zealand factories. Big thank you to our partners at SG Systems for making the process efficient and easy. I recommend to try our “Delicious Doughnuts” for yourself! Consistency is an attribute all customers deserve, V5 System empowers that”
